All library bindings are guaranteed for life.

Grades K-1

Bearcub Books are expertly crafted to help emergent readers foster a love for reading! Each book features carefully leveled text paired closely with bright, captivating photos, making it easy for children to follow along and gain reading confidence.

To assist educators, each book has been carefully reviewed by a reading specialist and also includes a “Teaching Tips” section to engage readers before, during, and after reading.

Grades K-3

Fusion Books introduce beginning readers to the wonderful world of nonfiction. A mixture of illustrations and photographic images invites readers to explore the world around them as they transition into nonfiction reading. Simple and clear text that is suitable for beginning readers introduces fun, factual, and engaging content to invoke curiosity about everyday life—from the wild and wacky to the downright gross.

Grades 2-6

Bear Claw Books are a bold and graphic way to keep readers turning the pages on nonfiction content. Colorful graphic illustrations bring exciting narrative nonfiction to life while engaging backmatter materials provide further context for the shocking true tales. An excellent resource for reluctant readers or anybody who loves a good story!

Grades 2-6

Create! Books go hands on with learning! Simple, step-by-step instructions and large, full-color photographs guide readers through activities and projects that engage their minds and their maker muscles. Projects specially designed with children in mind make curriculum topics approachable for all types of learners—and help them have fun along the way!

Grades 1-7

Roar! Books take readers on a high-low adventure. These exciting, edgy nonfiction books hook struggling and reluctant readers with gripping content and an exciting design. Meanwhile, simple sentence structure and word choice keeps them turning the pages with ease. Packed full of fascinating topics and twisted tales—and with three levels to choose from—these roaring reads will turn every child into a prolific page-turner.

NEW!

Grades 2-7

SilverTip Books reach upper elementary, middle school, and ELL students struggling to access core curricular topics at reading level. The high-interest design and tone speaks to an older audience while a clear format and 2nd–3rd grade reading level brings them up to speed with their fellow classmates in a clear and concise way. Dyslexic-friendly font and design keeps accessibility top of mind while featured SilverTips for Success help readers review what they’ve learned and prepares them to ace their next test. The entire SilverTip experience is designed with student success in mind!

Grades 3-8

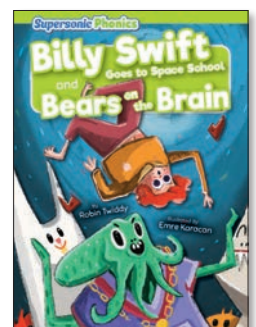

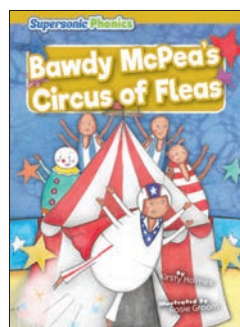

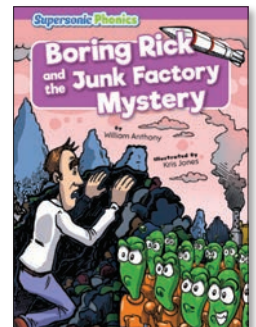

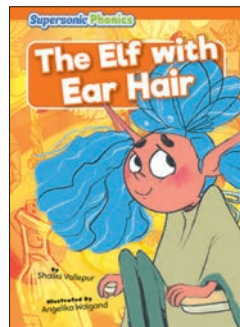

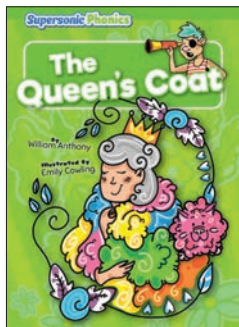

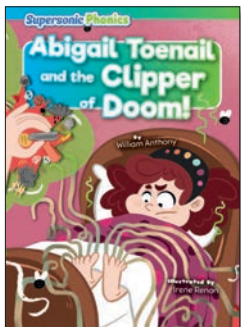

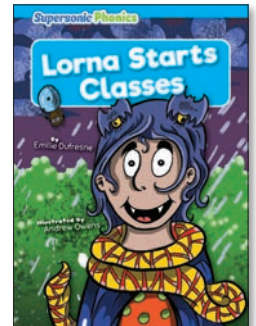

Bearport Books are high-interest, visually appealing books that focus on fun and unusual topics that readers love. Trade-like design, using a combination of both photographs and illustrations, and playful titling are what distinguish us in the K-8 educational market. For years Bearport has been creating books that feel less like supplemental texts and more like the books children really want to read.

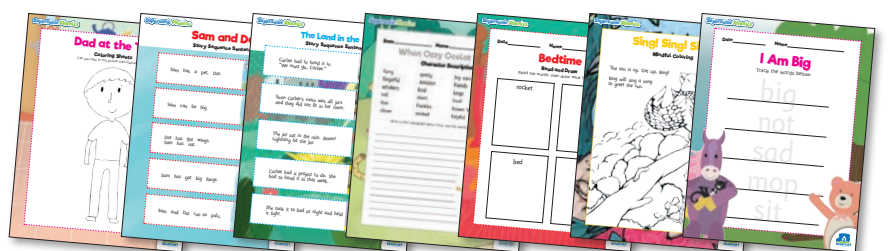

Supersonic Phonics

Decodable Leveled Readers

A comprehensive approach to phonetically decodable reading!

- 166 fiction titles across 13 levels, available in library binding, paperback, and ebook formats
- Fun, quirky stories engage young readers
- Includes teaching tips and comprehension questions
- Teacher/Parent Resources available for each book ▶

The Organization

Supersonic Phonics begins with the very basics of phonetically decodable reading. Starting with the earliest step of consonant, vowel, consonant words and building on this combination slowly, the reader follows a prescribed format supported by the science of reading to encourage reading development. This systematic and sequential approach supports most phonics programs.

LEVEL 0 • LILAC

Books support children's developing speaking and listening skills as well as the linking of sounds and letters. Children are encouraged to enjoy books from as early an age as possible. The focus of this phase is on using imagination to build stories, rather than on directly reading. In our level 0 books, there are no words.

LEVEL 1 • PINK

LEVEL 2 • RED

Books introduce simple letter-sound combinations. As each set of letters is introduced, children are encouraged to use their new knowledge to sound out and blend words. For example, they will learn to blend the sounds s-a-t to make the word sat.

LEVEL 3 • YELLOW

LEVEL 4 • BLUE

Children build on the letter-sound combinations learned in levels 1 and 2. They learn consonant digraphs (sounds made up of two letters together such as 'ch' or 'll') and long vowel sounds (such as 'igh' or 'ai').

LEVEL 4/5 • BLUE/GREEN

Children will practice their knowledge in this level and will learn to read and spell words that have adjacent consonants (for example, trap, strong, milk, and crept).

LEVEL 5 • GREEN

LEVEL 6 • ORANGE

LEVEL 7 • TURQUOISE

LEVEL 8 • PURPLE

Children will learn new graphemes and alternative pronunciations for known graphemes. For example, they have already learned /ow/ as in 'cow' and will now learn /ow/ as in 'blow'. In addition, they will learn alternative spelling for known phonemes. The sound /igh/ has been taught as the grapheme igh as in 'night' but can also be spelled 'y', 'ie', and 'i-e'.

LEVEL 9 • GOLD

LEVEL 10 • WHITE

LEVEL 11 • LIME

Children read with increasing fluency. They will have learned most of the common letter-sound combinations and can read familiar words automatically without needing to sound out and blend.

Supersonic Phonics Color Band Levels

Supersonic Phonics is organized by level and color bands, providing a consistent and structured approach that helps guide and support reading instruction. As the reader moves through the color band levels, the page numbers, amount of repetition, and sentence structure complexity all advance at a rate that encourages development and reading confidence.

Read and Rhyme Level 1

This series introduces young readers to decodable words through a simple rhyme scheme. Each book features six words from the same word family to reinforce the sound and letter combination. With Guided Reading Levels at B, Read and Rhyme: Level 1 has been designed as the first level in a three-part approach to learning word families. These fun and engaging books are guaranteed to help early readers expand their vocabulary and build a strong reading foundation.

Read and Rhyme Level 3

This series introduces young readers to decodable words through a fun and quirky rhyming story. Each book features up to 10 words from the same word family to reinforce the sound and letter combination. With Guided Reading Levels at C-E, Read and Rhyme: Level 3 has been designed as the third level in a three-part approach to learning word families. These engaging books are guaranteed to help early readers build their reading skills and confidence.

The Baseball Diamond

Baseball games are played on a field called a baseball diamond.

Players take turns hitting the ball. This is called being at bat.

If they hit the ball, they run around the diamond. Getting back to home plate gives the team a point.

22

Glossary

Let's Play!

I throw the ball.
Swish!
It goes into the net.
Let's play basketball!

Past and Present

Take a trip through time to explore how people of the past lived. The history of everyday items and places encourages comparing and contrasting while an invitation to make predictions about the future engages further exploration. In addition to a broader history of the progression over time, supplemental details take a closer look at a specific topic within each title category. Perfect for prompting readers to take a fresh look at the world around them!

Why Does My Body Do That?

Cough! Burp! Sniff! Our bodies make many sounds. But what do all these sounds mean? Explore the wild, wacky, and (sometimes) downright gross things our bodies do. From burps to coughs, scabs to the shivers, engaging STEM topics with clear text and bright photos makes science fun. A simple infographic refreshes the content for visual learners as they finish flipping through the body books they won't want to put down.

Save the Animals!

Where are the buzzing bees, pudgy polar bears, or great gorillas? Across the globe, animals are disappearing. But there's still hope to stop this tragic trend before it's too late. Bright photos paired with carefully leveled text feature key animal life cycle and environmental science curriculum. A bold range map helps readers pinpoint exactly where each animal lives and practical tips for young readers makes taking action personal. Explore what we can do to save the animals!

On Thin Ice

Drip, drip, drip.
Arctic ice is melting.
 But this is the polar bear's home.
 What will happen to the big bear?

Poet to a President

It was a big day for Amanda Gorman.

8

Simone fell in love with **gymnastics**.
 She worked very hard.
 And she was good.
 Simone started winning **medals** when she was 14.

What's Up with Water?

Every living thing on Earth needs water to survive. But why do we need it, where does it come from, and how do we save it? This valuable series answers these questions and more while introducing early science concepts to emergent readers. Vibrant photographs and diagrams will aid readers in learning about the water cycle, how people use water, and what that means for the environment.

Internet Issues

The internet connects us with people from all around the world. We use it every day to buy things, play games, talk with friends, and learn about the world around us. It is very useful, but it's important to stay safe while surfing the web. Gain key digital literacy through a fun combination of illustrations and photos. There don't need to be any *Internet Issues*.

Colorful Minds: Tips for Managing Your Emotions

Our minds are full of color. But what do you do when one color shines brighter than the others? This series is the ultimate mindfulness toolkit packed with tips and activities that help readers manage strong emotions. Beautiful and engaging visuals replicate a hand-drawn doodle style while the content aids in self-awareness and personal development for young children, allowing them to find their own ways of dealing with every emotion in the rainbow.

Whose Poo?

Have you ever looked down on the ground and seen something brown? It could be squishy or sticky, hard and round, flat and splatted, or piled in a mound. Eww—that's poo! But whose poo could it be? Look inside to find out.

Once Upon a STEM: The Science of Fairy Tales

Have you heard the story of Jack? You know, the one where he plants the magic beans, and a giant beanstalk shoots up into the sky. Have you ever wondered what a scientist would make of that beanstalk? Well, wonder no longer because Professor Everafter is here, and he is going to put these fairy tales under the microscope.

Fuel Up!

What do we do if we are hungry? We eat something, of course! We quench our thirst with a drink and go to sleep when we are tired. Our bodies need all sorts of fuel in order to work their best. But what happens if we don't get everything that we need? Get ready to *Fuel Up!* and learn all about the fuel we need.

Amazing Moments in Sports

A miracle, a comeback, the GOAT taking home gold—some of the greatest stories of our day have happened on the field, ice, and gym. Follow the true story of athletes and teams who have gone down in history. Exciting graphic illustrations paired with nonfiction content bring these compelling stories to life, while an expanded history of the sport and other amazing moments bring the learning full circle.

LAST MEALS, STRANGE DEATHS

We eat to stay alive. However, some unlucky people have found themselves finished by food.

Let's find out about some of the people who met their death after a feast.

FRANZ REICHEL

HIS MISTAKE: A COAT

Franz Reichelt was a tailor. His job was to make clothes.

But Franz wanted to do more.

He wanted to fly. Franz made a coat to help him fall slowly, just as a parachute would.

JUMPING OVER THE MOON

Astronauts say walking without gravity is strange. What happens when they jump?

Gravity is six times stronger on Earth than it is on the moon. That means you could jump much higher on the moon!

On Earth, most jump about 12 off the ground. on the moon w more than 9 fe

A kangaroo on the moon could jump more than 33 ft (10 m) high.

SERIOUS SCIENCE

Science is always serious, right? Wrong! Science can be anything but stuffy and stiff.

Bodies are far from serious. And the science in them can be sillier than you think.

Welcome to the Silly Zone. Get ready to learn the strangest things about bodies!

Supernatural Survivor

What would it take to make it through an alien invasion or zombie apocalypse? Join the hi-lo adventure to imagine what it would be like if the supernatural creatures of your nightmares were real . . . and were taking over the planet. Learn the lore of creatures rising from the grave, wrapped in bandages, and coming to Earth from another world. Struggling readers in grades 5 and 6 won't be able to put down these accessible books written at the 2nd and 3rd grade reading level.

THE MUMMY'S CURSE

You may really want to open a mummy's tomb to peek inside. Don't!

Ancient Egyptians believed if mummies were disturbed, the pharaohs would not reach the **afterlife**. Some tombs were filled with **booby traps** to keep the mummies safe.

And there are even some tombs that may have **curses**.

Curses are no joke been said to cause bad luck to illness

ZOMBIES CANNOT SWIM

Zombies can barely walk, let alone swim. Escape a zombie by tricking it into some deep water, such as a swimming pool or a pond.

A zombie will be stuck splashing around in the water for a long time.

AIM FOR THE HEAD

If you can't trick a zombie with water, you may have to attack.

AIM HERE!

A zombie's brain is the only thing that keeps it walking around. Aim for a zombie's head to stop it once and for all.

THE WILD, WILD WEST

In the late 19th century, the western parts of North America became known for crime. Many people ignored laws and did bad things.

There was a famous group of outlaws called the Wild Bunch. It was led by Butch Cassidy. The Wild Bunch got money by robbing trains and banks.

 WILL BE PAID TO ANYONE WHO
 BRINGS BUTCH CASSIDY
 DEAD OR ALIVE

BUTCH CASSIDY

Police had guns. Outlaws had guns. Ordinary people had guns. It was no wonder there were lots of gunfights in the Wild West!

Billy the Kid was one of the most well-known gunmen in the Wild West. One time, he was caught by police. But he got free and went on the run. He was finally found again and shot.

PIECES OF THE PAST

There are secrets hidden everywhere. You just need to know where to look. Clues to the past might be buried under your feet right now.

Town and d just e

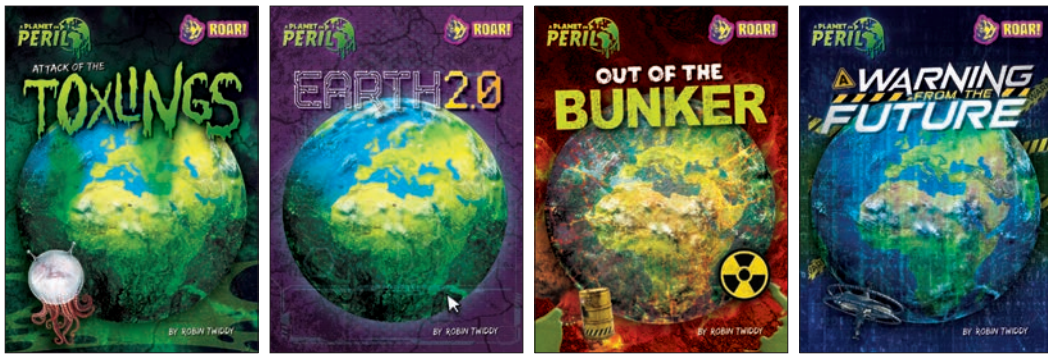

The past was hard for those who had to live through it.

Let's take a journey into the past. Are you ready to learn about the hideous history of woeful wars?

A Planet in Peril

When acid rain falls from the sky and piles of plastic overflow into the streets, how will we survive? Follow the narrative of children in the not-too-distant future dealing with a planet in peril to learn the potential consequences of trashing our planet in the present. These hi-lo adventures are a perfect way to explore environmental science and inspire readers to take action before it's too late. Struggling readers in grades 6 and 7 won't be able to put down these accessible books written at the 3rd and 4th grade reading level.

LESSON 1: FOSSIL FUELS

The first lesson begins with the basics. What are fossil fuels?

Fossil fuels include coal, oil, and natural gas. It took millions of years for these fuels to form underground on Earth.

COAL
The dark rocklike substance known as coal comes from plants that were buried under soil millions of years ago. Over time, heat and pressure turned these plants into coal.

GAS
Gas was formed in a... But different tempero... levels of pressure crea... gas underground inst...

OIL
Oil formed from the remains of small animals and plants that fell to the bottom of the ocean. The remains were covered and, like coal, slowly changed over millions of years.

RECYCLE, REUSE, REDUCE!

This future I am in is pretty scary. You could say it's Terry-fying... but YOU can still save it!

RECYCLE
I know that I said recycling wasn't perfect, but it's better than letting that plastic get into the sea.

REUSE
Stop! Don't throw away that jar. Instead, reuse it! That would make a perfectly good pen holder.

REDUCE

The most important thing you can do is reduce the amount of plastic you use. Do I need this plastic duck? I do love him, but I don't need him. Look for alternatives to plastic.

That means making choices like drinking from metal straws instead of plastic ones. Use canvas bags instead of plastic bags. If you want a friend in the bath, get a real duck!

The First Thirteen
The United States started as 13 colonies. These were like small states with local governments. They had to listen to the bigger British government, too.
People in the colonies were called colonists. Some were angry they had to follow British laws. They wanted more say in what happened to them.
Some British laws were about taxes. The colonists had to pay extra money when they bought certain things. There were colonists who thought the taxes were too high.

Divided Power
The Constitution also created a bigger, stronger national government. There were three branches. Each branch was given specific powers. The legislative branch was to make laws. The executive branch would make sure the laws are followed. The judicial branch decided if laws were fair.
Many lawmakers work together in the legislative branch. The head of the executive branch is the president. The Supreme Court is at the top of the judicial branch.

Plant-tastic!

Making food from sunshine, dripping with poison, and even eating living animals—what can't plants do? Take a fresh look at the plant kingdom, focusing on the science behind the living things that give us oxygen, provide us with food, and fill our world with color. Bright, engaging photos and fun, lively text will keep readers turning the page while a final activity makes learning about science hands on. It's Plant-tastic!

TRAPPED!

A buzzing fly lands on the leaf of a small plant. The insect doesn't know it, but it has just made a big mistake. The plant is a Venus flytrap. Suddenly, the leaves snap shut! The fly is now the plant's prisoner, and there is no escape. This plant eats meat!

Venus flytrap leaves have little hairs. When something touches the hairs, the leaves close.

ANIMALS PLANT SEEDS!

Animals can move seeds in other ways, besides in their droppings. Squirrels collect acorns—the seeds of oak trees—and bury them in the ground to save for later. During the winter, squirrels dig up and eat some of the seeds. Any acorns left buried can grow into new oak trees.

Some ants also collect and store seeds underground. The seeds they don't eat grow into new plants, too.

Library of Awesome Animals

In this series, readers will learn about animals that are adorable, weird, and especially awesome! Each 24-page book features controlled text with age-appropriate vocabulary and simple sentence construction. Eye-catching photos closely align with clear, descriptive text. These delightful, informative books will quickly become children's favorites.

Showing Off

When spring approaches, it is time for migrating birds to return home. This is also when hummingbirds start to show off their flying skills by swooping around their mates. When a male has mated, it's time for the female to start a nest for her eggs.

MOTHER BIRDS USE FEATHERS AND SKIN SPRINGERS TO B...

18

Terrific Teeth

Escaping enemies can make puffers hungry. What do these fish eat? Their diet is made up of **algae** as well as other fish. They also chow down on shellfish, including mussels and clams. Puffers crack through hard shells with four superstrong teeth. **CRUNCH!** Their chompers are joined together in a shape that looks like a beak.

PUFFER FISH TEETH NEVER STOP GROWING. EATING THROUGH HARD SHELLS KEEPS THE TEETH TRIMMED.

Totally Not True!

Have you seen a Bigfoot or heard rumors that Elvis is alive? People believe in all sorts of tall tales. But how can we know what is totally true? We can use the scientific method! It's easy to bust myths using science. Ask a question, gather the evidence, and test it out. Will the myth hold up to explosive science? There's only one way to find out!

Tough Times to Be a Kid

If you think making your bed and getting your homework done is tough, imagine what it must have been like to live in a time with no toilets or where you have to start training as a soldier when you were just seven! The past is full of tough times to be a kid. Learn what it was like to live amongst the pyramids, sail in a Viking ship, and more in this high-interest series that will have you grateful for your life in the modern day.

Inside the Storm

Sheets of rain slash down from a dark sky. Fierce winds send heavy objects flying through the air. The noise is deafening as the storm rages. Then, a sudden quiet settles in as the eye passes over. But the calm won't last for long as one of the strongest kinds of storms on Earth barrels forward. Take cover—it's a hurricane!

China, the Philippines, and Japan have gotten the most hurricanes in the past 50 years.

The Great Galveston Hurricane of 1900 was one of the deadliest in U.S. history. It killed as many as 12,000 people as it demolished the Texas port city.

It's possible we won't ever see another hurricane as deadly as this one.

The Great Galveston Hurricane of 1900 was one of the deadliest in U.S. history. It killed as many as 12,000 people as it demolished the Texas port city.

It's possible we won't ever see another hurricane as deadly as this one.

ABOUT OUR CONNECTION BOXES:

Want to avoid hurricanes? Make sure in the globe's least likely to be hit by a hurricane.

NO MORE WEATHER-DAY WORRIES!

REPAIRING THUNDERSTORMS THAT INCLUDE SEVERE WINDS, LIGHTNING, AND THAT USUALLY LEAD TO A TORNADO BUILD UP.

A tornado may look almost see-through, sand debris is picked up by the funnel.

Disturb that air and:

- Water
- Food coloring in your favorite color
- Dish detergent
- A tornado tube connector or duct tape

Step One
Fill one bottle with water about three-quarters full. Add a couple of drops of food coloring and one drop of dish detergent.

Step Two
If you are using a connector, screw the tornado tube connector onto the bottle. Otherwise, skip this step.

Step Three
If you're using a connector, screw the second bottle on top of the tornado tube. Make sure it's tight so there are no leaking holes. If you're using duct tape, place the second bottle on top of the one with water. Wrap the tape around both bottle tops to secure them tightly.

Step Four
Turn the bottles over so that the empty one is at the bottom. Make the bottle spin in a circle to start a vortex. After a few seconds, you will see the water begin swirling. Slowly and watch your tornado twist away!

X-treme Facts: Engineering

Have you heard of the dam so massive it actually added a fraction of a second to every day? Or seen the bridge that literally disappears below the ocean? Explore these extreme feats of engineering and more through an engaging design and lively text written with a sense of humor. A hands-on activity at the end of each book brings learning about engineering concepts to life. This series features STEM curriculum made fun and is especially wonderful for reluctant readers.

Suspension Bridge

Craft Project

If you're an engineer who needs to design a bridge spanning thousands of feet over a body of water, you'd probably choose a suspension bridge. That style can span greater distances than any other type of bridge. Try your hand at building a long and strong bridge.

What You Will Need

- A piece of cardboard 17 x 11 inches (43 x 28 cm)
- Construction paper
- Scissors
- Glue
- 2 pipe towers
- A piece of thin cardboard 17 x 5 in. (43 x 13 cm)
- A block maker
- 4 paper tubes
- Tape
- String

Step One

Glue blue construction paper in the center of the cardboard. This is the river. Cut a piece of green construction paper in half. Glue the green paper on either side of the blue paper. Wrap the juice boxes in construction paper and glue a juice box in the center at each end of the cardboard. These are the piers of your bridge.

Step Two

Grab the piece of thin cardboard black crinkling lined down the center. Measure and mark the center. Use scissors to cut two slits on each side of the center point. This is the bridge deck.

Step Three

Take a paper tube to the cardboard base on each side of a pier. Begin for the other pier. These are the support towers. Cut two slits at the top of each tube as shown in the photo.

Step Four

Cut two pieces of string, 40 (102 cm) long. Position the deck between the towers. Cut one string through on one side of the deck. Fit string through the slits on the towers. Then, tape the string in place on the bottom base, underneath the pier, the other side of the deck.

Wild wheels

Today's cars share crowded highways with huge buses, freight trucks, and many other vehicles. There are some really wild sets of wheels on the road! Tiny cars zip through traffic, while long limousines give riders lots of luxury. Some vehicles are even ready to go off the roads. Let's buckle up and test drive some wacky wheels!

The biggest buses in the world can hold hundreds of passengers.

Limousines are so long they can't fit in a garage.

The fastest car on Earth has two engines and moves quicker than the speed of sound.

The world's smallest car is only 4.3 in (11 cm) long. It can barely fit the driver.

How do you expect me to fit into that?

How do you expect me to fit into that?

An amphibious truck named DUKW is designed to drive on roads, off roads, and through deep water. It can even carry a tank.

DUKWs were designed to move military troops over land and water. Now, they're used for water rescues and sightseeing tours.

Big tires with deep treads allow off-road vehicles to drive through sand, mud, water, and rocks.

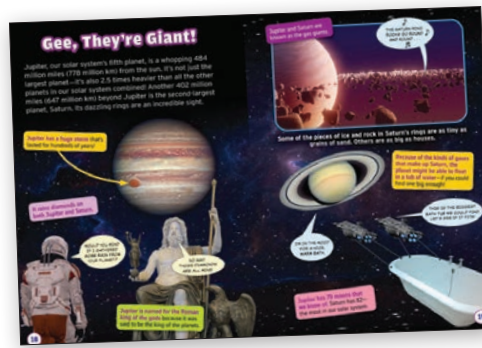

Who needs a driver?

X-treme Facts: Space

Did you know that the planet Mercury is slowly shrinking? Or that people grow a little taller while in space? Readers will explore STEM curriculum in a fun and enticing way that is so fun they will forget that they are learning.

Life on Earth! Biodiversity Explained

From the open ocean to the forest floor, living things are in danger. Explore the importance of biodiversity and the current threats against the plants and animals that are key to the survival of entire ecosystems. Investigate and explore the impact of a loss of biodiversity on our planet, the direct effects on animals around us, and how it could negatively impact humans. Readers will learn the problems of the present, what they might face in the future, and what they can do to help all life on Earth.

TODAY'S TRIP IS TO COLOMBIA!

Colombia is a country in the continent of South America.

FACT FILE

Capital city: Bogotá
 Main language: Spanish
 Currency: Colombian peso
 Flag:

Currency is the type of money that is used in a country.

CASTLES

Germany has more than 25,000 castles. We might recognize some of them. The Neuschwanstein castle inspired many famous fairy tales!

The Landgrafenschloss castle in the city of Marburg also inspired stories. The Brothers Grimm went to school in Marburg. Later, they wrote "Cinderella," "Rapunzel," and many more fairy tales.

A Young Winner

Lupita Nyong'o cried tears of joy as she held her award. The crowd clapped and cheered for the young actor who just won the 2014 Oscar for Best Supporting Actress. It was Lupita's first role in a major movie, and she had just earned one of the biggest awards in the business.

Queen of Firsts

Throughout her rule, Elizabeth challenged the way the royal family did things. When she was crowned, she asked for the event to be shown on television so everyone could watch. In 1970, she was the first British queen or king to walk in crowds and shake hands with her people. Elizabeth wanted to be more approachable to those she served.

Elizabeth loved to spend her spare time with her corgis and terriers.

Elizabeth had more than 30 corgis throughout her life.

Heroic Dogs

Readers will learn how working dogs are trained for their jobs and discover how dogs and people come together to accomplish seemingly impossible goals.

Stormy Weather
Hindenburg lifted off from Frankfurt, Germany, on the evening of May 3, 1937, carrying 36 passengers and 61 crew members. Its journey across the Atlantic Ocean was slowed by **headwinds**. The airship was hours behind schedule by the time it reached Boston, Massachusetts, just before noon on May 6. Then, thunderstorms meant Captain Max Pruss had to wait before flying over New York City. When the craft finally passed over, people rushed out of their homes and offices to catch a glimpse of the airship.

Traffic came to a standstill as people watched Hindenburg fly over Manhattan.

Flight over Manhattan
Weather, once again, delayed the journey. Hindenburg reached its final destination airship was due to land at Lakehurst, New Jersey, but continuing thunderstorms made it dangerous. Instead, Pruss steered the zeppelin along New Jersey's beaches while he waited for the weather to clear. At 6:22 p.m., when the storms had passed and it was finally safe to land, the airship was now half a day late.

Thunderstorms made it dangerous to land.

1665

A DEADLY DISEASE

In 1665, a terrible disease tore through London, England. Almost one in every four people died of the **plague**.

Plagues were not new. In the 1300s, a plague called the Black Death swept across Europe. In a few years, it killed a third of all Europeans. There was no cure for this very **contagious** disease. The sickness most likely started in Asia and traveled to Europe by infecting people along a network of trade routes. In 1625, another outbreak of plague killed 40,000 Londoners.

Spread by Rats
We now know these plagues were caused by a **bacteria** found on fleas. It spread so quickly because fleas live on rats, which were everywhere from the city's dirty streets to its cramped, **unhygienic** homes. At the time, however, people thought the disease was caused by something in the air. They tried to protect themselves by sniffing **herbs** and lighting fires.

Fleas on black rats carried the bacteria called Yersinia pestis that caused plague.
