# A Giant Toad

The cane toad is the biggest toad in the world.

One of these **amphibians** can grow to the size of a soccer ball.

Cane toads grow up to nine inches (22.9 cm) long. They can weigh up to five pounds (2.3 kg).

# Hungry Hunters

Cane toads are big eaters.

They will hunt and eat almost anything they can catch and swallow.

Insects are their favorite food.

They love to eat beetles, honeybees, ants, and crickets.

However, they also eat larger creatures such as snakes, frogs, birds, and small furry animals.

Cane toads hunt for food at night. They hide and rest during the day.
