The background of the page is a vibrant photograph of green foliage. In the upper left, there is a cluster of small, yellow, bell-shaped flowers. In the lower right, a cluster of small, pink, star-shaped flowers is visible. The central text is contained within a dark, rounded rectangular box that has a light-colored border.

Butterfly

A monarch butterfly
flutters toward a flower.

It has a small black body
and big orange wings.

Butterflies
are **insects**.

How did it get that way?

A butterfly starts life inside a tiny egg.

An egg forms when male and female butterflies **mate**.

After mating, the female lays an egg on a milkweed plant.

The egg is only about the size of the head of a pin.

enlarged
egg

Male butterflies
have two black
dots on their wings.
Females don't have
these dots.
